

# Mobile ID Mustering Solutions

TTI and Smart Media Innovations (SMI) have developed a range of Hardware & Software Emergency Mustering products – specifically designed to operate when the Mustering Facility provided by the core access control system is not available for use.

The SMI Software products are designed to operate with the ST4 Ruggedized Handheld device series from TTI and a range of card technologies.

Connect to existing Access Control Systems:

AMAG, Johnson Contol, Lenel etc.....
