

Mobilising Leneel® OnGuard

TTI and Smart Media Innovations (SMI) mobile identification/verification solution is now available integrated with the OnGuard® security management software suite by Leneel. Users may now add a mobile extension to their Leneel system – as a simple add-on.

The products utilise DataConduit™ functionality from Leneel to allow:

- * Connection to the OnGuard® database
- * The choice of data to be displayed and design of the hand-held screen
- * The wireless “reading” of a card – and display of cardholder details
- * A backup database to be held on the ST4 hand-held device – if no wireless network is present
- * The write back of that read – directly into the OnGuard® database

Alarm Monitoring - System Account - [SMI Trace Monitor]

Alarm Description	Time/Date	Controller	Input/Output	Card	Priority
Granted Access	16:30 19/07/2007	SME	PDA 1 - In	(6598)	50
Granted Access	16:30 19/07/2007	SME	PDA 1 - In	(434)	50
Granted Access	16:30 19/07/2007	SME	PDA 1 - In	(350)	50
Granted Access	16:30 19/07/2007	SME	PDA 2 - In	(7541)	50
Access Denied	16:30 19/07/2007	SME	PDA 1 - In	(2054)	150
Granted Access	16:30 19/07/2007	SME	PDA 3 - In	(7854)	50
Granted Access	16:30 19/07/2007	SME	PDA 3 - Out	(434)	50
Granted Access	16:31 19/07/2007	SME	PDA 3 - Out	(6598)	50
Granted Access	16:31 19/07/2007	SME	PDA 1 - In	(26511)	50
