## TTI Announces New Mobile Optical Biometric Finger Print Reader

Newport Beach, CA, January 11, 2008 – Trijay Technologies International Corporation (TTI) today announced the release of a New Mobile Optical Biometric Finger Print Reader. The TTI BCR200 BT is a uniquely designed mobile smart card reader with built-in Optical finger print scanner. The product is design to provide convenience for usage in mobile as well as desktop environments. Using the state of art optical biometric engine, the device provides superior performance in finger print capturing and matching.

Using Bluetooth communication, The TTI BCR200 BT can remotely transfer secured captured fingerprint data to any Bluetooth-enabled PDA, laptop, or mobile phone. This modular feature enables organizations to seamlessly integrate BCR200 BT with their existing Identification equipment and infrastructure allowing mobile and remote fingerprint authentication and verification.

A built-in rechargeable li-polymer battery allows it for mobile usage and supports USB charging.

“ This new BCR200 BT fingerprint hardware device is a natural addition to our current Mobile ID Verification Hardware.” Says Chuck Weiglin, Chief Operating Officer

### About TTI :

Providing solutions to central & local government, corporate, retail, and security industries, Trijay Technologies International Corp. (TTI) combines proven biometric systems and secure identification technologies to satisfy any needed specific requirements. From OEM fingerprint modules, access control and T&A systems to complete national smart card, border and port security control and e-passport schemes, TTI's capabilities cover conception and design to implementation and complete customer service. TTI delivers some of the most technological and reliable identity management solutions available in the industry today. TTI focuses on strategies that are designed to manage costs, increase quality, mitigate risk, improve business agility, and strengthen security.
